SUMMARY

Resourceful and driven Computer Science Engineer with strong leadership experience, full-stack development skills, and a passion for delivering impactful digital solutions. Proven track record in managing technical teams, building scalable web applications, and leading campus-wide initiatives. Eager to contribute to innovative projects that merge technology, creativity, and strategic thinking.

TECHNICAL SKILLS

- **LANGUAGES**: PYTHON, C, JAVASCRIPT, SOLIDITY, JAVA, C++
- **WEB & FRAMEWORKS**: HTML5, CSS3, REACT.JS, ANGULAR, FLASK, NODE.JS
- **DATABASES**: MYSQL, POSTGRESQL, FIREBASE
- **TOOLS**: GIT, GITHUB, NOTION, POSTMAN, FIGMA, VS CODE
- **CMS/APIS**: SANITY CMS, LEAFLETJS, OPENSTREETMAP API
- **OTHER**: AGILE METHODOLOGIES, UI/UX DESIGN, RESTFUL APIS

EXPERIENCE

Software Developer Intern June 2025
Geojit Technologies Pvt. Ltd.

- Developed and maintained responsive, scalable front-end interfaces using Angular, integrated with SQL databases and middleware APIs to deliver production-grade web applications. Collaborated with agile, cross-functional teams to ensure UI consistency, code quality, and system reliability in a corporate environment.
- Took initiative in optimizing performance (35% improvement) and streamlining UI–middleware workflows, improving application efficiency and user experience across multiple platforms.

Web Lead August 2024 – August 2025
EETI Foundation

- Spearheaded the design and development of EETIF's official website using React.js and Sanity CMS, boosting online engagement by 70% and reducing content update time by 50% through streamlined workflows and responsive UI design. Maintained and optimized the platform for 99% uptime, 100% content accuracy, and enhanced UI/UX accessibility, ensuring a seamless and inclusive experience across all devices.

LEADERSHIP & ACTIVITIES

Student Lead January 2025 – Present
IEDC BOOTCAMP CEC

- Led digital transformation at IEDC, developing a self-sustaining, tech-driven ecosystem by automating workflows and optimizing systems for a 40% efficiency boost. Directed 10+ innovation initiatives, increasing student engagement by 60% and tripling startup participation.
- Mentored 250+ students in web development, productivity tools, and technical leadership. Guided junior teams to independently execute flagship events like *exodia*, strengthening campus tech culture and innovation.

Notion Campus Leader August 2024 – Present
Notion

- Built a growing community of Notion users on campus, conducting hands-on workshops and peer sessions to help students streamline their academic and personal productivity. Collaborated with Notion's global team to bring exclusive resources and opportunities to students, while tailoring content and events to local needs and student workflows.

EDUCATION

Bachelor of Technology in Computer Science and Engineering September 2022 – July 2026

College of Engineering Chengannur, Alappuzha

Higher Secondary Education July 2020 – April 2022

St.Thomas HSS, Thirumoolapuram, Thiruvalla

PROJECTS

4 Wayanad – Developer & Project Coordinator

- Designed and deployed a real-time disaster relief web platform to support flood and landslide-affected regions in Wayanad, July 2024. Integrated live inventory tracking from relief camps to enable efficient donor supply chain management. Received recognition from local media for impactful community support.

Digital Vehicle Assistant (DVA) - Full Stack Developer & Project Coordinator

- Built an open-source smart web platform for fuel-efficient route planning and real-time vehicle management, featuring fuel station discovery, refueling history, maintenance reminders, and SOS alerts. Developed using React.js, Flask, PostgreSQL, LeafletJS, and OpenStreetMap API to enhance driving efficiency, safety, and cost optimization.

Smart Vault - Python-based File Encryption System

- Developed Smart Vault, a Python-based file encryption system using AES encryption and a USB device as a physical authentication key, packaged as a standalone .exe application for secure and user-friendly deployment.
